

Boiler Valve Stand

Free Standing Boiler Valve Assemblies

Key Features

- Simplify Installation
- Convenient Access
- Save Time & Money
- Professional Appearance
- Sample Stream Options
- Insures Configuration
- Corrosion Resistant Panel

Application

BVS boiler pre-fab systems include a blowdown valve, throttling valve, 1" probe cross, 3/4" flush valve on bottom of cross, 1/2" blue poly panel for separately ordered controller, pre-wiring of probe and blowdown valve to controller, 5' tall powder coated steel legs with floor mounts.

Model: BVS-30-10

Options

- B By pass line with second NFC-1/2
- D Adds a second sample stream & valves
- C Continuous configuration with second NFC-1/2
- P 3/4" probe cross instead of 1" cross
- S Sample cooler (not pre-plumbed)
- L Second 1/2" blue poly panel on lower section

Note: If ordering a two sample stream stand and the by pass option (B) is desired, order it twice
