

Replacing the Morr/Pulsafeeder 3 wire electrode with the Advantage part TE-3A

The Advantage Controls conductivity electrode part number TE-3A is a direct replacement for the Morr/Pulsafeeder part TE-2A.

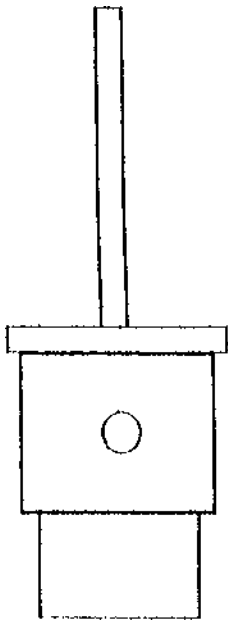

The mounting tees for the two electrodes are different, so a change must be made to the piping. Electrically both parts are identical. All that is required is that the wiring color code be matched up as per the diagram below.

Parts breakdown The TE-3A electrode assembly is composed of the following parts:

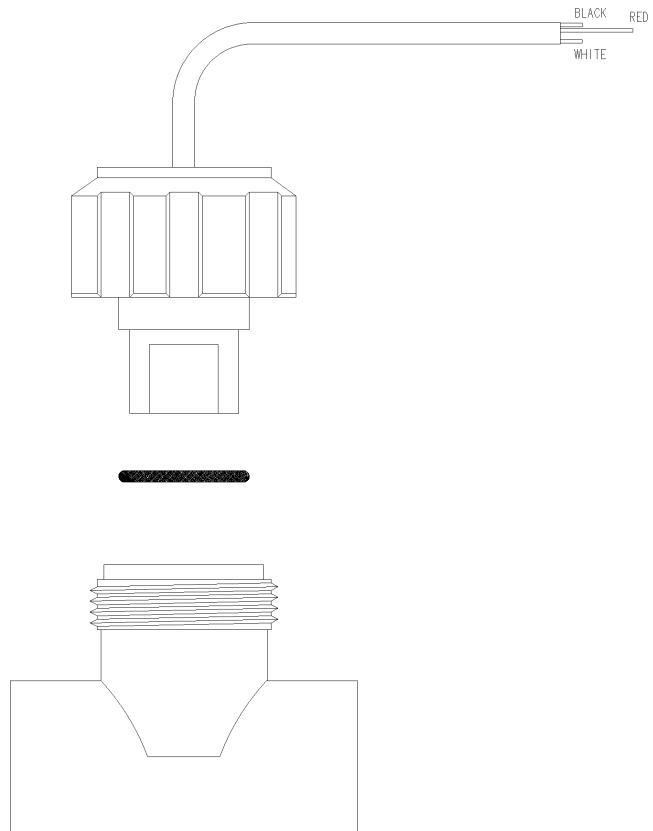

- 1.) E-3A electrode
- 2.) E-30 O-ring
- 3.) T-3 3/4" mounting tee

Wiring of Electrodes

Pulsafeeder Controller		Advantage TE-3A Electrode
Red	Electrode	Green or white
Black	Electrode	Black
Green	Temp.Comp.	Red
