Upgrading to a MegaTron MT Dual Network Card

This guide is designed to help with upgrading a MegaTron MT to use dual network BMS "H15, H25, or H26" communication cards.

Warning! Unplug the controller from incoming power.

1. Remove the display panel.
2. Install liquid tight with CAT5 cable out of the right side of the enclosure using one of the provided knockout positions.
3. The communication card slot is the far right-hand slot on the motherboard. Make sure card is firmly seated in motherboard header.
4. Connect CAT5 cable to card.
5. Replace display panel and power controller back on.

Dual Network Card Setup

Note: Screens may vary slightly between models.

Step 1:
Press **Setup/Run**, **CONFIGURE, FACTORY.**
(See figures 1, 2 and 3. Enter the Factory password. Contact Customer Service for this information.)

Step 2:
Press **CARDS, COM CARD, BMS CARD.**
(See figures 4, 5 and 6.)

Step 3:
Use the up/down arrows to select the appropriate BMS card type. Press **Enter** to accept.
(See figure 7)
