

WEBADV-PREMIUM1

Advantage Controls has added a number of new features on WebAdvantage for all MegaTron controllers manufactured after October 1, 2025. These new units will automatically have the additional features to use on WebAdvantage. Older units can have these new features activated for a one time fee of \$125.00 per controller.

Quick Review History – A user will be able to identify one custom report for a controller that will be available with a single click from the Home page to view the last hour of history for critical readings in the live zoom chart format.

Name	Serial #	Status	Type	Access	Company	Graphical	Text	Reports	History
South Lift	GREG	✓ Online	XS MegaTron		Greg's Test Co...				
UK-1104	UK-1104	✗ Offline	XS MegaTron		Greg's Test Co...				
ZZZ-TEST4	STEV								
ZZZ-TEST2	XS-TE

Total “ON” Time in Reports – Custom reports can now include the total amount of “ON” time for event history (relays and alarms) during the period of the report in the legend.

Auto Time Synchronization

Users will be able to enter the time zone of a controller under Manage Device and then WebAdvantage will automatically keep the time correct in the controller. This includes changes in time due to daylight savings.

Note: This feature is available for all units regardless of manufacture date for device admins and up.

Time Synchronization: Auto Synchronization

Time Zone: America

America/Chicago

Event Logs Shown as On/Off in CSV

A new selection while building a custom report allows the legend type to be set for On/Off for relay and alarm events. With this selected CSV history logs show these events as On/Off instead of 0/1.

SYS2 System Temper	Purple	Left	Average
Relay 3 - Fan	Black	Left	Average
Relay 4 - R4	Black	Left	On/Off in Logs

/ GHouse / System 1: Environment / Notepad

Graphical View Text View Notepad

Notepad		
Name	Reading	UOM
Free Chlorine	3	PPM
pH	7	
Test Note	0	

View Last Notepad Entry

The last manually entered Notepad entry will now be shown while viewing controller settings and readings. When you go into the Notepad settings of a system card.

Notepad Checklist Reporting – A custom report can set notepad channels as Note Y/N to show entries or 0 as a no and 1 as a yes in the report graph. This allows the notepad entries to be used to show what a rep or end user has “checked” during their site visit.

Repeat Alarm Suppression Selectable per Controller

WebAdvantage suppresses sending the same alarm email again for 60 minutes. If a particular alarm is sent, and the alarm goes away and then comes back on, WebAdvantage does not send the alarm again for 60 minutes. This new selection allows for reducing the amount of time from 60 minutes down to a low of 15 minutes.

Alarms and Reports:

Repeat Alarm Email Suppression:

Active

60 mins

Water Meter and Flowmeter Ongoing Totals in Reports

A new selection while building a custom report allows user to add the meter’s ongoing totalizer into the legend of a custom report along with the total for the period of the report

SYS1 W Meter 1 Hou	Black	Left	Average w/Totaliz	NONE	
Relay 1 - Bleed	Black	Left	Average	NONE	

Alarm Texting and Emailing

Individual users can purchase an annual subrcption for the ability to recieve alarms via text to the cell number associated with their user profile.

Note: A firmware upgrade may be required to give an individual controller the ability to communicate all of the premium features with WebAdvantage.
